EXPERIENCE

General Assembly

New York, NY
Sept. 2016 - Dec. 2016

Web Development Immersive

Netted over 700 hours of dedicated development time and built full stack applications with modern frameworks.

Tsundoku
- After learning about this word from a friend of mine, I decided to build an application based on it. With full CRUD functionality, users can search for any book and add them to their library.
- Technology: Google Books API, MongoDB, Node, Express

ReAsk
- For shy students, raising their hands to ask a question is a daunting task. This app targeted for classroom use allows for students to ask questions anonymously and increase the flow of the classroom without people getting stuck on something small.
- Technology: React.JS, Socket.IO, PostgreSQL

More Ore
- A incremental game I made with thousands of plays. The main premise of the game is to gather More Ore! Unlock extra furnaces to smelt ore faster, Upgrade your pickaxe for more ore per click, hire heroes to go on quests, or miners to mine for you!
- Technology: React.JS, SCSS

H&J Investors Corp

New York, NY
Feb. 2014 - Sept. 2016

Building Manager
- Managed a 3 story office building and helped with property rentals, negotiating and enforcing leases, as well as maintaining and securing the premise.

Crossmark

New York, NY
Mar. 2016 - Sept. 2016

Team Lead
- Managed a team of 2-6 individuals to produce a fast and efficient end product. Ensuring planogram integrity, stock check, and teaching new hires the basics.

EDUCATION

Queensborough Community College   **2014-2016**
Major: Computer Science
